

# K-II METER Theory

Researched by the

*Theory:* In theory a spirit can communicate with you through this meter by lighting up the LED lights. There would be 2 dashes of light if the answer is yes, and 1 dash of light if the answer is no.

## *Facts about the K-II Meter:*

The K-II Meter is an EMF (electro magnetic field) Meter.

The range of readings on the meter is from 1mg to 20+mg.

The unit of measurement is milligauss (mg).

The range from the meter to most EMF sources is from 0 to 6 feet.

The K-II Meter is more sensitive to radio frequencies than other EMF meters.

The K-II Meter will pick up:

Cell phone signals within a 6-foot radius

Car alarms within a 10-foot radius

2-way radios/Walkie Talkies within a 50+-foot radius

## *Testing the K-II Meter:*

While testing the K-II meter we found out that if you are holding down the button with your thumb for a long period of time that you will naturally cause your thumb to slightly move causing the meter to give you false readings. In our research we slid a plastic rectangle to hold down the button so we do not get any false readings. Some other groups out there have installed a switch on their K-II meters, which will work the same way.

# *K-II Meter research during our investigations:*

Investigation #1: Revolutionary War Site - September 6, 2007 - used by:

Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #2: Chandler Estate - September 13, 2007 - used by: Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #3: Chandler Estate - September 15, 2007 - used by: Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #4: Hanging Tree - September 21, 2007 - used by: Mike Cardinuto

Justin DiGangi

Results: 1mg during the entire investigation. No activity

Investigation #5: Mt. Misery Road site 1 - September 27, 2007 - used by:

Mike Cardinuto

Results: In response to some questions the meter lit up 2 LED lights twice for a supposed answer of (yes). During EVP questions all of the lights lit up twice for an answer of (yes). Thos occurred two times during the entire night. Possible activity

Investigation #6: Suffolk County Fire House - September 29, 2007 - used by:

Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #7: Ronkonkoma County Park - October 4, 2007 - used by:

Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #8: Lake Ronkonkoma (west) - October 18, 2007 - used by:

Mike Cardinuto

Rob Levine

Results: 1mg during the entire investigation. No activity

Investigation #9: Old Burial Hill - November 1, 2007 - used by: Mike Cardinuto  
Rob Levine

Results: 1mg during the entire investigation. No activity

Investigation #10: Garibaldi-Meucci Museum - November 3, 2007 - used by:  
Mike Cardinuto  
Justin DiGangi

Results: During this investigation there were 3 occurrences we had with it.

All of the activity that was caught through the meter was in the basement.  
All activity responded to some EVP questions. Question 1: Do you mind that we are investigating here tonight? The meter blinked once for (no) up to 10mg, which is 3 LED lights. Question 2: Do you mind that this place is being renovated? The meter blinked once for (no) up to 10mg, which is 3 LED lights. Later on that night down in the basement when Justin was using the K-II he also ask the same EVP question Do you mind that this place is being renovated?, and he got the same response. Possible activity

Investigation #11: Suffolk County Potters field - November 8, 2007 - used by:  
Rob Levine  
Jaiem Fleischmann

Results: 1mg during the entire investigation. No activity

Investigation #12: Mt. Misery Road Site 1 - November 29, 2007 - used by:  
Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #13: Sweet Hollow Road - November 29, 2007 - used by:  
Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #14: Aldrich Lane Cemetery - November 29, 2007 - used by:  
Jaiem Fleischmann

Results: 1mg during the entire investigation. No activity

Investigation #15: Old Burying Ground Cutchogue - November 29, 2007 - used by:  
Jaiem Fleischmann

Results: 1mg during the entire investigation. No activity

Investigation #16: Queen Mary California - December 4, 2007 - used by:  
Mike Cardinuto

Results: While investigating in the boiler room with Chris Flemming, while we were doing an EVP session the K-II meter jump to 10mg, which is 3 LED, lights. After the meter jumped Chris Flemming said that he saw something move to the left of him. Mike Cardinuto also said that he saw something move. Otherwise during the rest of the investigation the meter was steady at 1mg. Possible activity

Investigation #17: Fort Totten New York - December 9, 2007 - used by:  
Mike Cardinuto  
Mike Bainbridge  
Paul Guarino

Results: 1mg during the entire investigation. No activity

Investigation #18: Islip Terrace Fire House - December 29, 2007 - used by:  
Jaiem Fleischmann  
Mike Bainbridge

Results: 1mg to 10mg  
10mg due to EMF source. No activity

Investigation #19: Katie's Bar New York - January 1, 2008 - used by:  
Mike Bainbridge

Results: 1mg to 10mg  
10mg due to EMF source. No activity

Investigation #20: Private Residence Lynbrook NY - January 11, 2008 - used by:  
Jaiem Fleischmann

Results: 1mg to 20+mg  
20+mg due to EMF source. No activity

Investigation #21: Burlington Prison New Jersey - January 26, 2008 - used by:  
Mike Cardinuto

Results: 1mg to 10mg  
10mg due to EMF source. No activity

Investigation #22: Private Residence Huntington Station NY - February 8, 2008 - used by:  
Mike Cardinuto

Results: 1mg to 2.5mg  
2.5mg due to EMF source. No activity

Investigation #23: Eastern State Penitentiary Pennsylvania - March 15, 2008 - used by:  
Mike Cardinuto

Results: While investigating down cellblock 9 between cells 38-40, we had the K-II meter on the ground in front of those two cells. We asked many EVP questions, which we got only one response to from the K-II meter. The question we asked was Do you like when people come to visit you?, the response was that the meter blinked twice for (yes). 3 LED lights went off to 10mg then 2 LED lights went off to 2.5mg. Possible activity.

Investigation #24: Private Residence Queens NY - April 4, 2008 - used by:  
Jaiem Fleischmann

Results: 2.5mg to 10mg. High readings from EMF source. No activity

Investigation #25: Ronkonkoma County Park - April 10, 2008 - used by:  
Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #26: 5 Corners Cemetery - April 17, 2008 - used by:  
Mike Cardinuto  
Rob Levine

Results: 1mg during the entire investigation. No activity

Investigation #27: Hanging Tree - May 8, 2008 - used by:  
Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #28: Private Residence Lynbrook NY - May 9, 2008 - used by:  
Mike Cardinuto  
Cheryl Wittmann

Results: 1mg to 2.5mg  
2.5mg due to EMF source. No activity

Investigation #29: Katie's Bar NY - May 20, 2008 - used by:  
Mike Cardinuto  
Mike Bainbridge

Results: 1mg during the entire investigation. No activity

Investigation #30: Revolutionary War Site - May 29, 2008 - used by:  
Rob Levine  
Jaiem Fleischmann

Results: 1mg during the entire investigation. No activity

Investigation #31: Shep Jones Road - May 30, 2008 - used by:  
Cheryl Wittmann

Results: 1mg during the entire investigation. No activity

Investigation #32: Mt. Misery Site 2 - June 5, 2008 - used by:  
Justin DiGangi

Results: 1mg during the entire investigation. No activity

Investigation #33: Suffolk County Potters Field - June 12, 2008 - used by:  
Rob Levine

Results: 1mg during the entire investigation. No activity

Justin DiGangi

Results: While investigating we put the meter into the woods about 15 feet in front of us asking a bunch of EVP questions. At one point the meter lit up 3 LED lights to 10mg twice for (yes). Possible activity

Investigation #34: Chandler Estate - June 19, 2008 - used by:  
Jaiem Fleischmann  
Mike Bainbridge

Results: 1mg during the entire investigation. No activity

Investigation #35: Private Residence Hicksville NY - June 14, 2008 - used by:  
Mike Cardinuto

Results: 1mg during the entire investigation. No activity

Investigation #36: Ronkonkoma County Park - June 20, 2008 - used by:  
Mike Bainbridge

Results: 1mg during the entire investigation. No activity

Investigation #37: Union Cemetery - June 26, 2008 - used by:  
Rob Levine  
Jaiem Fleischmann

Results: 1mg to 2.5mg  
2.5mg due to EMF source. No activity

Investigation #38: Lake Ronkonkoma West - July 3, 2008 - used by:  
Mike Bainbridge  
Results: 1mg during the entire investigation. No activity

Investigation #39: Rolling Hills Asylum New York - July 11, 2008 - used by:  
Mike Cardinuto  
Thelma D'Amico  
Results: 1mg during the entire investigation. No activity

Investigation #40: Ronkonkoma County Park - July 17, 2008 - used by:  
Mike Bainbridge  
Thelma D'Amico  
Results: 1mg during the entire investigation. No activity

Investigation #41: Hanging Tree - July 24, 2008 - used by:  
Mike Bainbridge  
Results: 1mg during the entire investigation. No activity

## *Overall Results:*

The overall result at this time is out of 41 investigations there were 5 possible occurrences of activity through the K-II Meter. Basically 1 out of every 8 investigations something possibly happened. Overall I would say that at this time the results that we have gotten do not support the theory of the K-II meter. In my judgment I would say that the theory is not consistent enough for this to be considered a fact for this meter. Even though we did get a few results, the results that we got were only for a few minutes out of an hour to about 8 hours of investigating time. As of right now that is our conclusion on the K-II meter. We will still research this theory, but I'm sure the results will remain the same.
